Pillar III : Quantitative and qualitative information

The publication of financial information with regard to regulatory capital and risk exposure is conducted on a consolidated basis in compliance with Article 2 of directive 44/G/2007. Other information about the parent company and significant subsidiaries is published separately, in compliance with Article 8 of the same directive.

Pillar 3 of the Basel III framework aims to promote market discipline through regulatory disclosure requirements with regard to supplementary financial communication. These requirements enable market participants to access key information relating to a bank's regulatory capital and risk exposure, in order to increase transparency and confidence about a bank's exposure to risk and the overall adequacy of its regulatory capital.

1. Management of capital and capital adequacy

1-1 Composition of regulatory capital

In June 2014, Bank Al-Maghrib's prudential regulations for the adoption of Basel III entered into force. Consequently, Attijariwafa bank Group is required to comply with, on both an individual and a consolidated basis, a core-capital ratio of no less than 5.5%, a Tier 1¹ capital ratio of no less than 6.5%, and a Tier 1 and Tier 2² capital ratio of no less than 9.5%. In addition to these requirements there is a capital conservation buffer (on the basis of core capital) equal to 2.5% of risk-weighted assets. When the capital conservation buffer is included, the minimum limits are 8% for Core Equity Tier 1 (CET1), 9% for the Tier 1 capital ratio, and 12% for the total.

At the end of June 2015, in accordance with circular 14/G/2013, the regulatory capital of Attijariwafa bank Group comprised both Tier 1 and Tier 2 capital.

Tier 1 capital is determined on the basis of Core Equity Tier 1 capital (CET1) adjusted for: the anticipated distribution of dividends; the deduction of goodwill, intangible assets, and unconsolidated equity investments³ that are held in the capital of credit institutions and equivalent in Morocco and abroad, and in the capital of entities with banking-related operations in Morocco and abroad; and prudential filters.

Tier 2 capital consists mainly of subordinated debt whose initial maturity is less than five years. An annual discount of 20% is applied to subordinated debt with less than five years of residual maturity. Tier 2 capital is restricted to 3% of risk-weighted assets.

At June 30, 2015, Group core capital amounted to MAD **30,026,251** thousand. Group Tier 2 capital amounted to MAD **7,147,114** thousand. Total capital amounted to MAD **39,173,365** thousand, 1.3% more than in December 2015.

1-2 Internal Capital Adequacy Assessment Process (ICAAP)⁴

In the framework of Pillar III, Attijariwafa bank has implemented a forecasting process for monitoring and measuring capital adequacy, in order to ensure that its capital provides permanent protection against risk exposure, in compliance with regulations set out by the regulatory authority.

1-3 Capital requirements

At June 30, 2015, Attijariwafa bank Group's total risk-weighted assets with regard to Pillar I, in compliance with circular 26/G/2006 (standards for calculating capital requirements for credit and market risk, using the standardized approach), amounted to MAD **308,888,553** thousand. Risk-weighted assets are calculated by means of the standardized approach for credit, counterparty, and market risks, and by means of the basic indicator approach for operational risk.

(in thousand MAD)
